Summary

A Front-End Web Developer with 4 years of experience in designing and implementing efficient, user-friendly, and responsive web applications. I have successfully delivered over 10 projects, focusing on quality and performance optimization. My expertise includes JavaScript, React, and creating seamless user experiences. I thrive in collaborative environments where I can share knowledge, learn from others, and contribute effectively to achieving common goals. I value teamwork as it fosters mutual support and enhances creativity in the development process.

Skills: React - Javascript - ReactQuery - Redux - Capacitor - Tailwind Css - Sass - Wordpress

Higher Education

Drawing Architecture

2017- 2020

Shahid Chamran Vocational Technical University, Kerman

Description :

Architecture is the art and science of designing and constructing buildings and other physical structures. It involves the creative process of planning, designing, and constructing spaces that are functional, aesthetically pleasing, and sustainable. Architects use their knowledge of engineering, principles of design, and practical experience to create spaces that meet the needs of individuals and society. They consider various factors such as the site, materials, environmental impact, and cultural context to create structures that are both visually appealing and functional. Architecture plays a crucial role in shaping the built environment and has a significant impact on the way people live, work, and interact with their surroundings.
